EVENT FLAG HIRE LTD

DRAPE INSTALLATION & SAFETY GUIDE

FLAME RETARDANCY

Our drape fabrics are manufactured from inherently **flame-retardant materials.**

However, once the fabrics leave our premises, Event Flag Hire Ltd cannot accept responsibility for their fire performance or the conditions in which they are used.

If your venue, event organiser or local authority requires additional or retrospective flameproofing, we recommend treating the drapes with **FLAME GUARD** (or an equivalent suitable product) in accordance with the manufacturer's instructions.

FLAME GUARD®

It is the customer's responsibility to ensure the fabrics comply with any venue-specific fire safety requirements before use.

INSTALLATION

Each drape is fitted with eyelets in all four corners for secure fixing.

- Secure each corner to your supporting structure using cable ties threaded through the corner eyelets.
- If you require a smooth, flat finish, pull each corner taut before fully tightening the cable ties.
- If the drape is longer than the area being covered, fold or roll the excess fabric upwards. Tie a knot in each upper corner, thread a cable tie through the knot and eyelet, then secure it to the structure.
- For a gathered or ruched effect, bunch the fabric into even pleats before securing.
- For a flat finish, keep the fabric evenly tensioned with no unwanted folds.

FIXING OPTIONS

STANDARD FIXING

Thread cable tie through eyelet and secure to structure.

EXCESS LENGTH

Fold/roll excess upwards, knot, thread cable tie through knot and eyelet, then secure.

RUCHED LOOK

Bunch fabric into even pleats before securing.

FLAT FINISH

Pull fabric taut to each corner for a smooth, flat finish.

TOP TIP

For large installations, we recommend using a long pole with double-sided tape wrapped around the end. This is an effective way to gently lift and smooth out any unwanted creases or pleats once the drape has been fixed in place.

SAFETY & DISCLAIMER

- Always install the drapes in accordance with the manufacturer's recommendations and ensure that the supporting structure and fixings are suitable for the intended application.
- Event Flag Hire Ltd accepts no responsibility for injury, loss or damage to persons or property arising from incorrect installation, unsuitable supporting structures or fixings, misuse of the product, or failure to follow the manufacturer's guidance and these installation instructions.
- The customer is solely responsible for ensuring that the installation is safe, secure and compliant with all relevant health and safety and fire regulations.
